

The National Action Plan for Child Injury Prevention - Webinar I

September 10, 2013, 2-3pm

Audio will begin at 2:00 PM ET.

You can listen through your computer speakers or call 866-835-7973

www.ChildrensSafetyNetwork.org

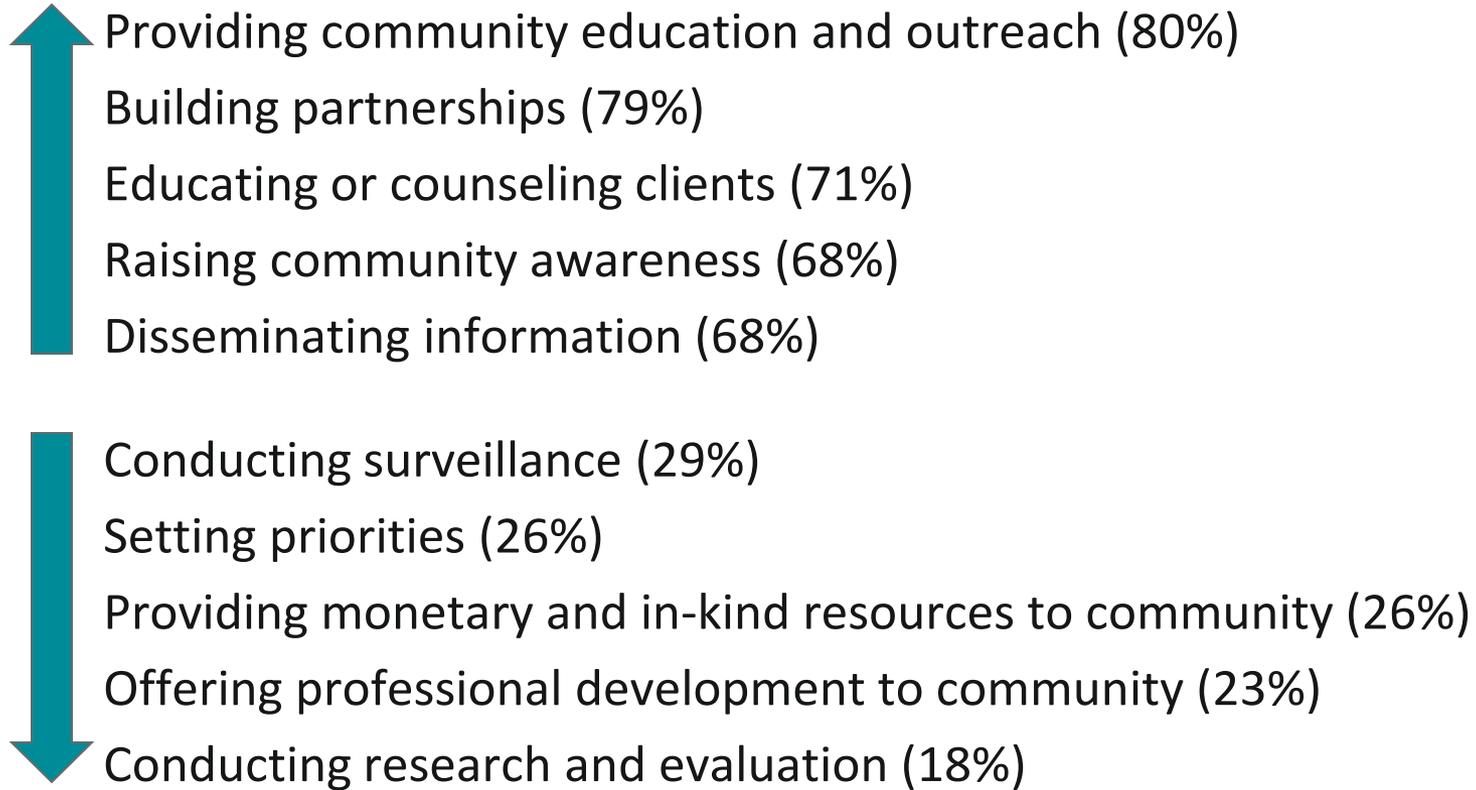

National Association of County and City Health Officials (NACCHO)

- Nonprofit membership organization
- National voice for approximately 2,600 LHDs
- Governed by a 27-member Board of Directors
- Advised by 40+ workgroups and committees
- 100+ staff headquartered in Washington, D.C.

What are LHDs doing to address IVP?

Meeting Orientation Slide

- If you are having any technical problems joining the webinar please contact the Adobe Connect hotline at 1-800-416-7640 or email csninfo@edc.org
- Type any additional questions or comments into the Q&A box on the left.

Presenter

YEARS

Launching a Roadmap for Injury-Free Childhood – **National Action Plan**

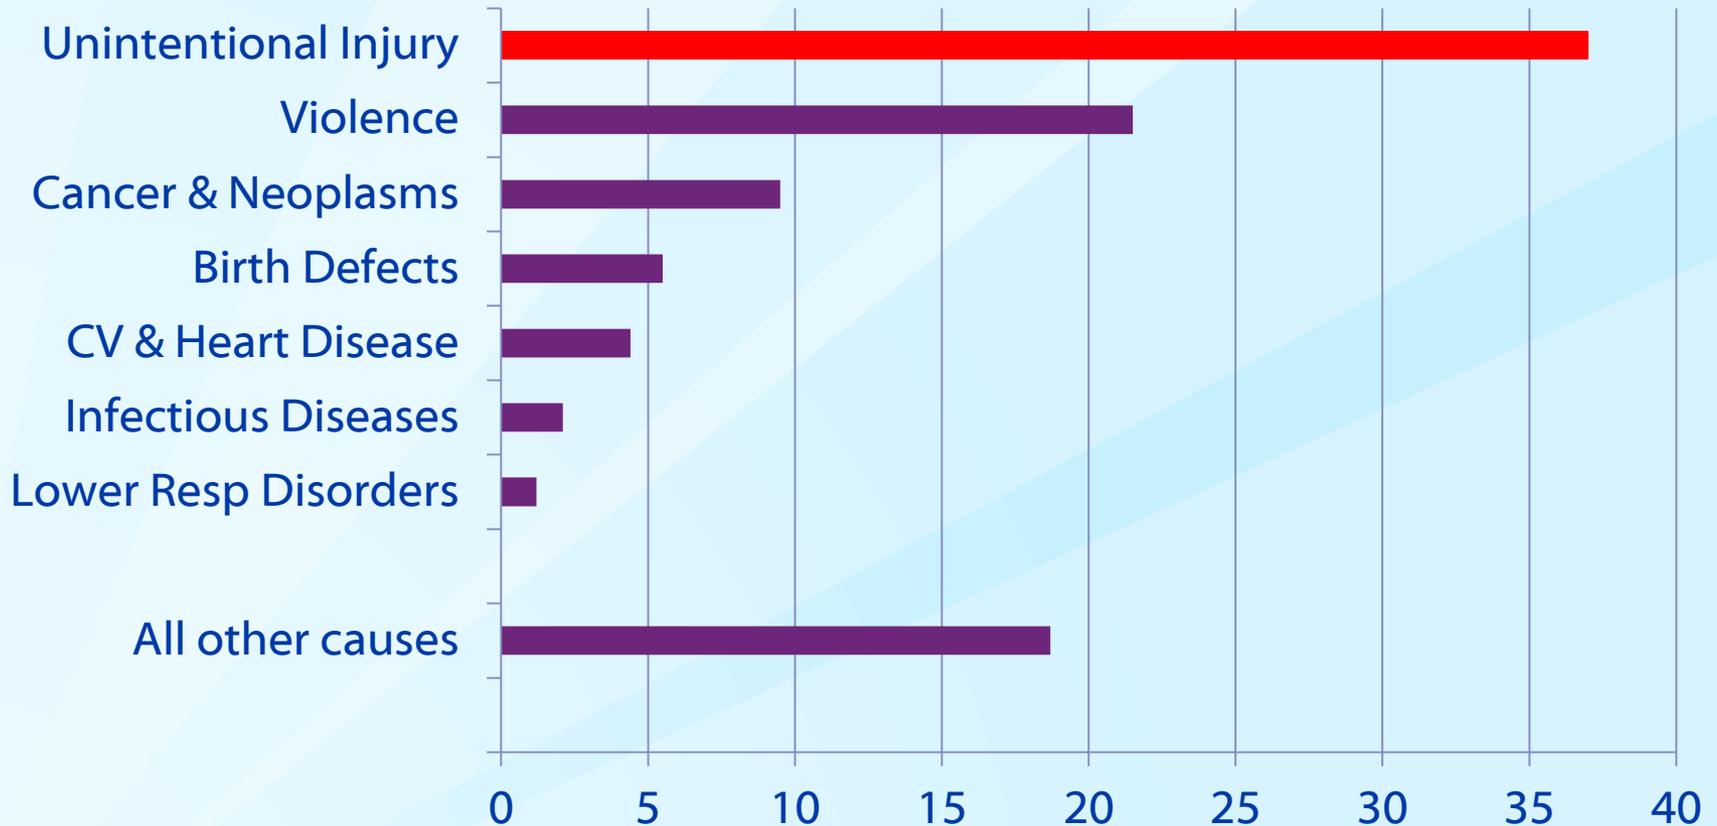

Julie Gilchrist, MD

Medical Epidemiologist

National Center for Injury Prevention & Control
Centers for Disease Control & Prevention

September 10, 2013

Percent of All Deaths Among Children 1-19 Years

From: WISQARS 2010 data. Cancer includes benign neoplasms; Birth Defects includes other perinatal mortality and pregnancy complications; Infectious Diseases includes influenza, HIV, meningitis

INJURY

The #1 killer of children in the US

For every **1** child that dies there are...

25

hospitalizations

925

treated in ER

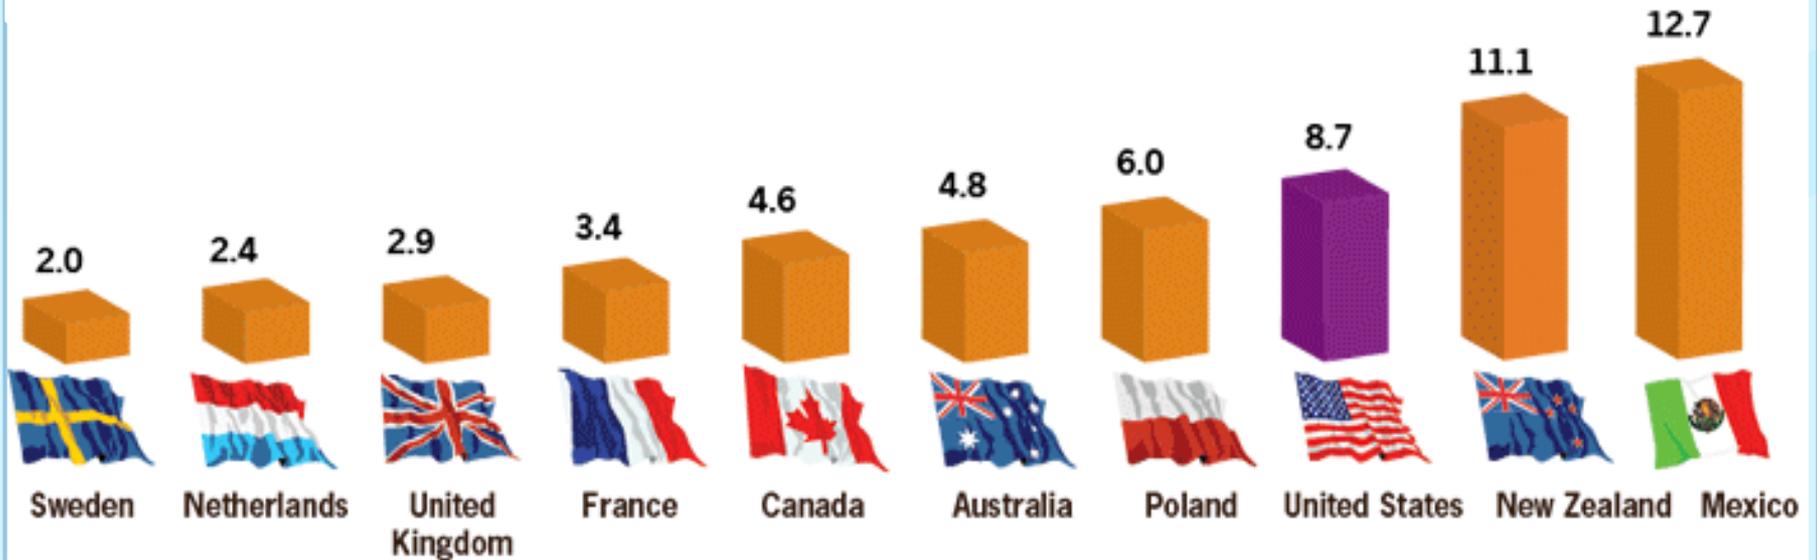

Many

more treated in
doctors' offices

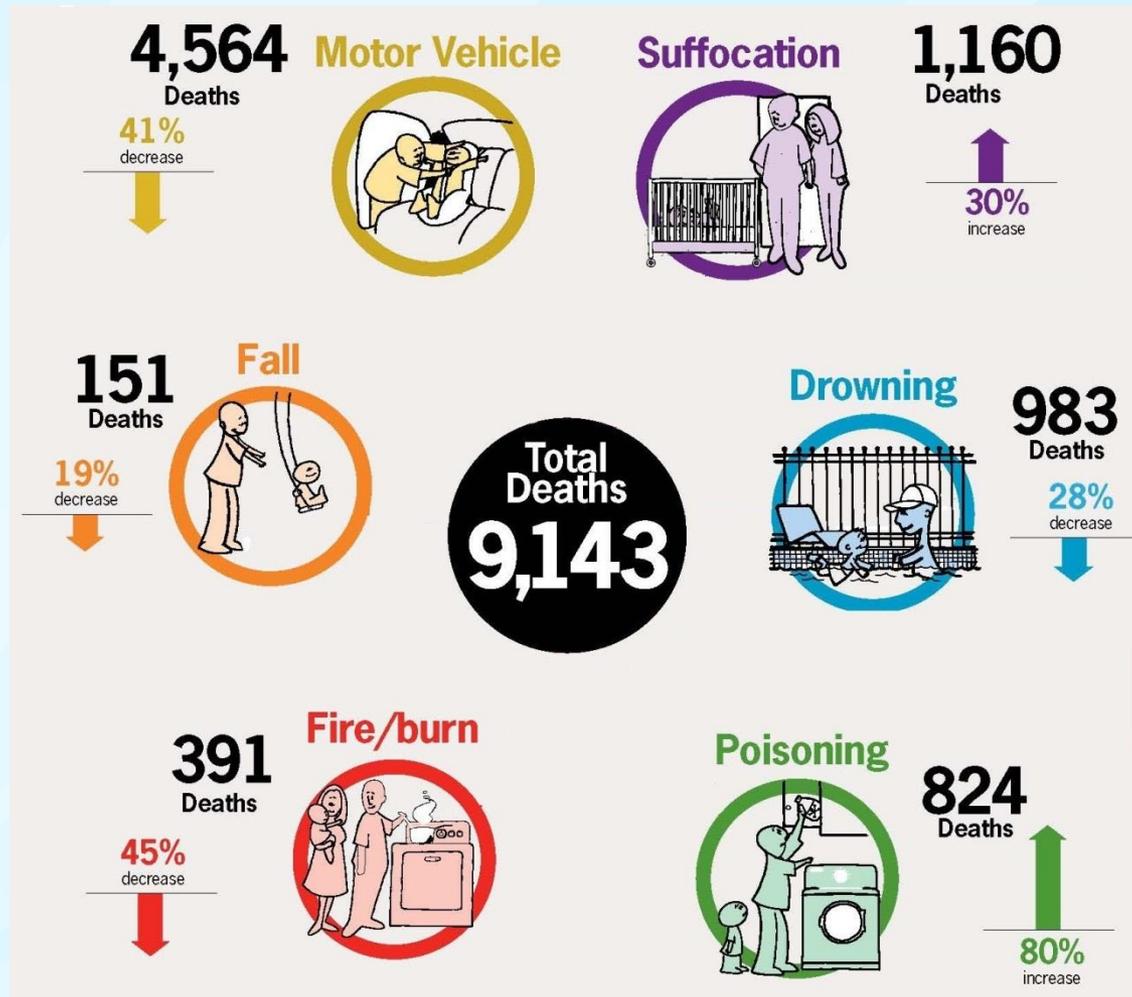

US Rates Poorly Compared with Others

Rate per 100,000 population 0-14 years

Unintentional Injury Deaths and Trends among U.S. Children 0-19 Years

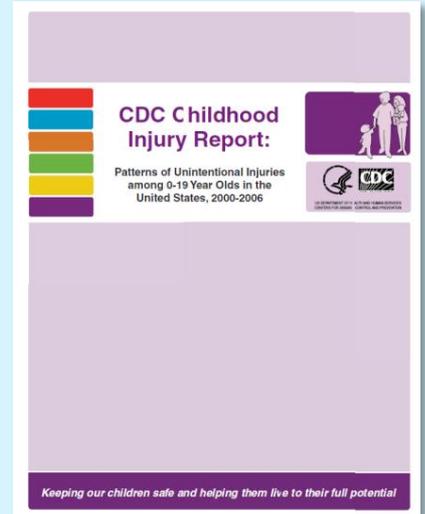

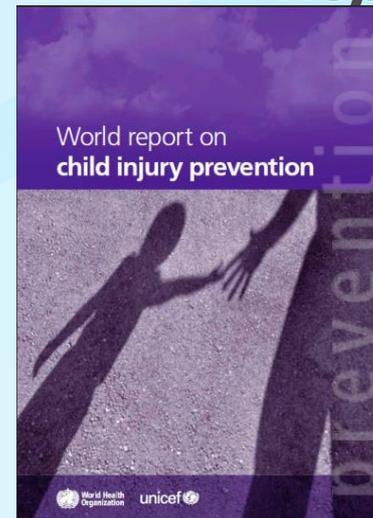

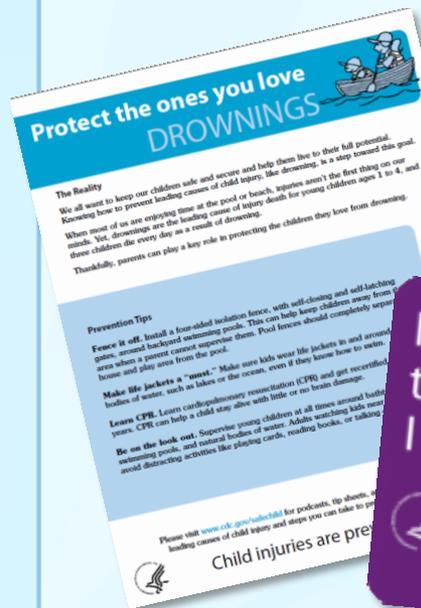

SOURCE: CDC Vital Signs, 2012; deaths – 2009, trends – 2000-2009

CDC's Role

- ❑ Identify and share tools and strategies
- ❑ Support organizations and individuals in their implementation

Protect the Ones You Love

World Report on Child Injury Prevention & CDC Childhood Injury Report

National Action Plan for Child Injury Prevention

- ❑ **Raise awareness**
- ❑ **Highlight prevention solutions**
- ❑ **Mobilize action**

A Framework for Action

- ❑ **Data & Surveillance**
- ❑ **Research**
- ❑ **Communication**
- ❑ **Education & Training**
- ❑ **Health Systems & Health Care**
- ❑ **Policy**

DATA AND SURVEILLANCE

Improve Existing Data Collection Systems

- ❑ Improve data quality (completeness and validity), use cause-codes to better understand the circumstances surrounding injuries**
- ❑ Enhance collaboration among key agencies and organizations that collect data; a more comprehensive understanding of child injuries can inform program and policy decisions**
- ❑ Standardize data collection and reporting of key data systems such as child death reviews. Can be used to inform decision making about interventions**

Upgrade/Enhance Systems to Address Gaps

- ❑ Add additional injury questions or modules into existing national and state surveillance systems**
- ❑ Collect true economic costs and long-term disability**
- ❑ Collect information on circumstances (e.g., activity, protective equipment)**
- ❑ Assess data needs for states, local communities, and underrepresented populations, and develop strategies to address such needs**
- ❑ Improve links among databases through sharing information, improving and sharing linking algorithms and approaches, and supporting the development of new technologies**

Improve Access to Data

- ❑ Use stakeholder input to understand data access barriers**
- ❑ Assess and address barriers for timeliness of data release/availability**
- ❑ Develop online access systems for key databases; systems should include enhanced functionality to query, analyze, and display data**
- ❑ Encourage sharing designs, protocols, procedures, software, and programs for data access systems**
- ❑ Develop and maintain a central, Web-based clearinghouse for key population-based databases**

Improve Analysis, Interpretation, and Dissemination of Surveillance Data

- ❑ Build capacity by training local public health practitioners and agencies to conduct analysis and interpret results**
- ❑ Develop plans for regular analysis and reports of key surveillance data**
- ❑ Tailor data reports for specific audiences and develop dissemination strategies for key decision makers**
- ❑ Support the use of local data, such as data from local hospital systems, to evaluate local prevention efforts**

IMPLEMENTATION

NAP Implementation Projects

- ❑ **Funded nine pilot projects**
- ❑ **Test the feasibility of implementing specific actions in the NAP**
- ❑ **Identify potential next steps and new avenues**

**“Knowing is not enough; we must apply.
Willing is not enough; we must do.”
~Goethe**

Presentation Overview

- NAP- Data and Surveillance
 - Improve existing data collection systems
 - Upgrade and enhance systems to address gaps in data
 - Improve access to data
 - Improve analysis, interpretation and dissemination of surveillance data
- Data resources and tools
- Local data- challenges and opportunities

Children's Safety Network- Annual State Fact Sheets

- Mortality Data

Illinois 2013 State Fact Sheet

Table 4: Leading Causes and Total Medical Cost in Thousands (\$1,000) for Hospital-Admitted Injuries by Age Group, Illinois Residents, 2010

| Rank | Age Groups | | | | | |
|------|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------|---------------------------|---------------------------|
| | <1 | 1 - 4 | 5 - 9 | 10 - 14 | 15-19 | 20-24 |
| 1 | Fall \$2,497 | Fall \$3,982 | Fall \$3,632 | Fall \$4,445 | MV Traffic \$19,464 | MV Traffic \$20,869 |
| 2 | Assault \$1,502 | Hot Object/ Substance \$3,144 | Pedestrian \$1,537 | Struck By/ Against \$2,526 | Assault \$13,534 | Assault \$13,877 |
| 3 | Suffocation \$1,397 | Assault \$1,519 | MV Traffic \$1,472 | Pedestrian \$2,067 | Fall \$7,210 | Fall \$9,859 |
| 4 | Hot Object/ Substance \$1,093 | Other Specified, NEC \$1,215 | Hot Object/ Substance \$1,049 | Assault \$1,931 | Self-inflicted \$8,760 | Self-inflicted \$6,736 |
| 5 | Unspecified \$1,006 | Unspecified \$958 | Struck By/ Against \$1,028 | MV Traffic \$1,668 | Firearm \$3,308 | Pedestrian \$4,354 |

Note: MV = Motor Vehicle. NEC = Not Elsewhere Classifiable. Source: Children's Safety Network Economics and Data Analysis Resource Center (CSN EDARC), at Pacific Institute for Research and Evaluation (PIRE), Calverton, MD, January 2013. Incidence based on 2010 data from the state and obtained from the XYZ State Inpatient Databases (SID), Healthcare Cost and Utilization Project (HCUP), Agency for Healthcare Research and Quality (AHRQ). Costs presented are medical costs in thousands. These injuries exclude patients who were dead at the time of discharge, readmission cases, transfers (e.g., from another short or long-term care facility, different acute care hospital), medical misadventures, and/or who suffered non-acute injuries. All counts were based on the patients' state of residence.

- Motor Vehicle
- Impaired Driving
- Open-Flame/Burns
- Violence
- Substance Abuse
- Health Services

**Injury Prevention: What Works?
A Summary of Cost-Outcome Analysis
for Injury Prevention Programs
(2010 Update)**

Website: <http://www.childrenssafetynetwork.org>
Communities: <http://csncommunities.ning.com>
Facebook: <http://www.facebook.com/pages/Childrens-Safety-Network-CSN/142795732414837>

(Fact Sheets)

Injury Prevention: What Works?

Reports on 160 Interventions

| | Youth | Adult | Youth & Adult | Total |
|------------------------|-----------|-----------|---------------|------------|
| Motor Vehicle | 10 | 0 | 28 | 38 |
| Impaired Driver | 1 | 10 | 0 | 11 |
| Open Flame/Burn | 1 | 0 | 8 | 9 |
| Violence | 15 | 17 | 2 | 34 |
| Other Injury | 6 | 2 | 3 | 11 |
| Substance Abuse | 22 | 4 | 10 | 36 |
| Tobacco | 4 | 17 | 0 | 21 |
| Total | 59 | 50 | 51 | 160 |

Estimated cost savings by select child injury intervention- What Works?

| Every Dollar Spent On | Saves Society |
|--|---------------|
| Childproof Cigarette Lighter | \$72 |
| Booster Seat | \$71 |
| Bicycle Helmet | \$48 |
| Child Safety Seat | \$42 |
| Zero Alcohol Tolerance, Driver Under 21* | \$25 |
| Smoke Alarm | \$17 |
| Pediatrician Counseling | \$9 |
| Poison Control Center | \$7 |

Children's Safety Network. Injury prevention: what works? A summary of cost outcome analysis for injury prevention programs (2010 update) [online]. 2010. [cited 2011 Mar 1]. Available from URL: http://www.childrencyasafetynetwork.org/publications_resources/PDF/data/InjuryPreventionWhatWorks.pdf.

Data Sources

- US & some international published and unpublished studies from 1987-2010
 - Medline & Internet search
 - Bibliographic review
 - Contact with Federal agencies
- Excluded analyses of occupational, air, rail, & water transport safety programs

Definitions: Costs and Savings

- Cost per Unit: cost of the intervention for a single individual
- Total Benefits per Unit: the amount the intervention saved by preventing injuries & other problems
- **Aggregate Benefit/Unit = Total Benefits - Cost**
- Benefit Cost Ratio (BCR): savings from preventing injuries divided by cost of the intervention
- Cost-effective: the $BCR > 1.0$
 - *Positive Return on investment if the intervention exceeds amount invested

Costs are estimated from a Perspective

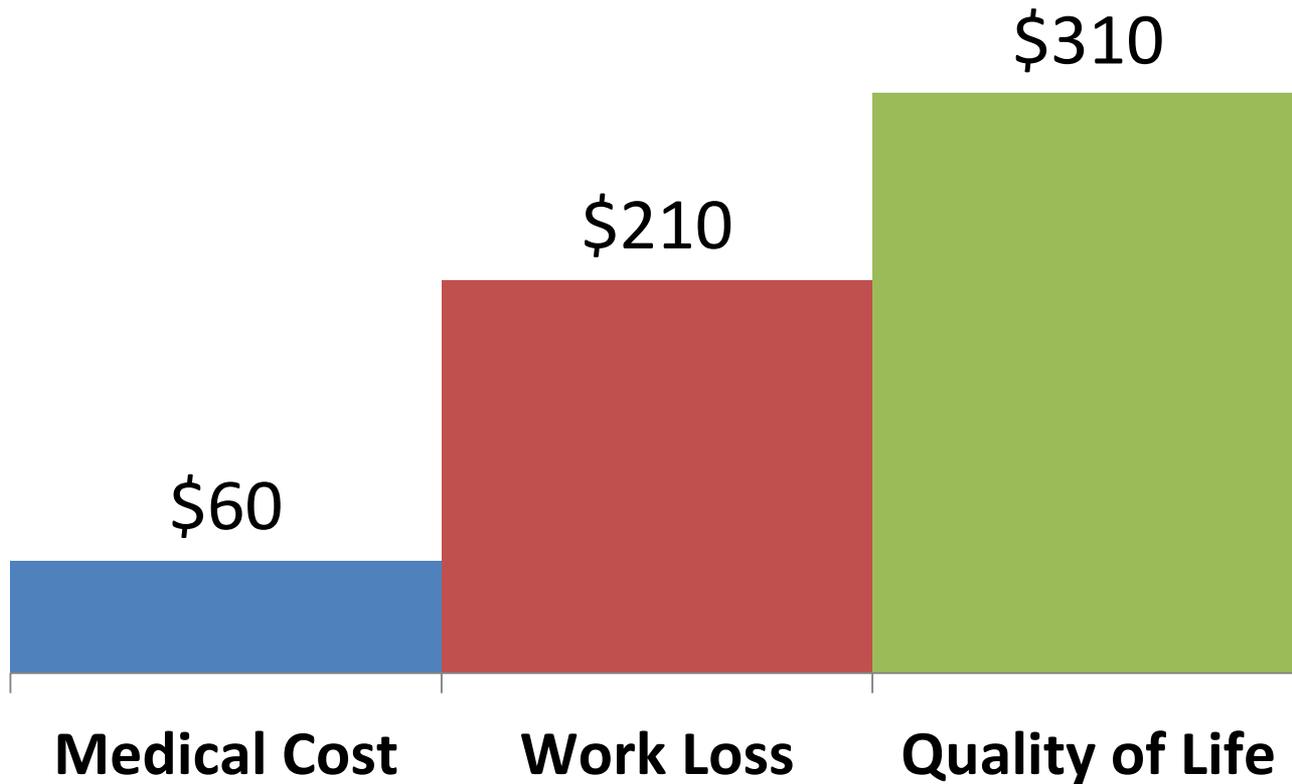

- Society
- Government
- Insurers
- Employers

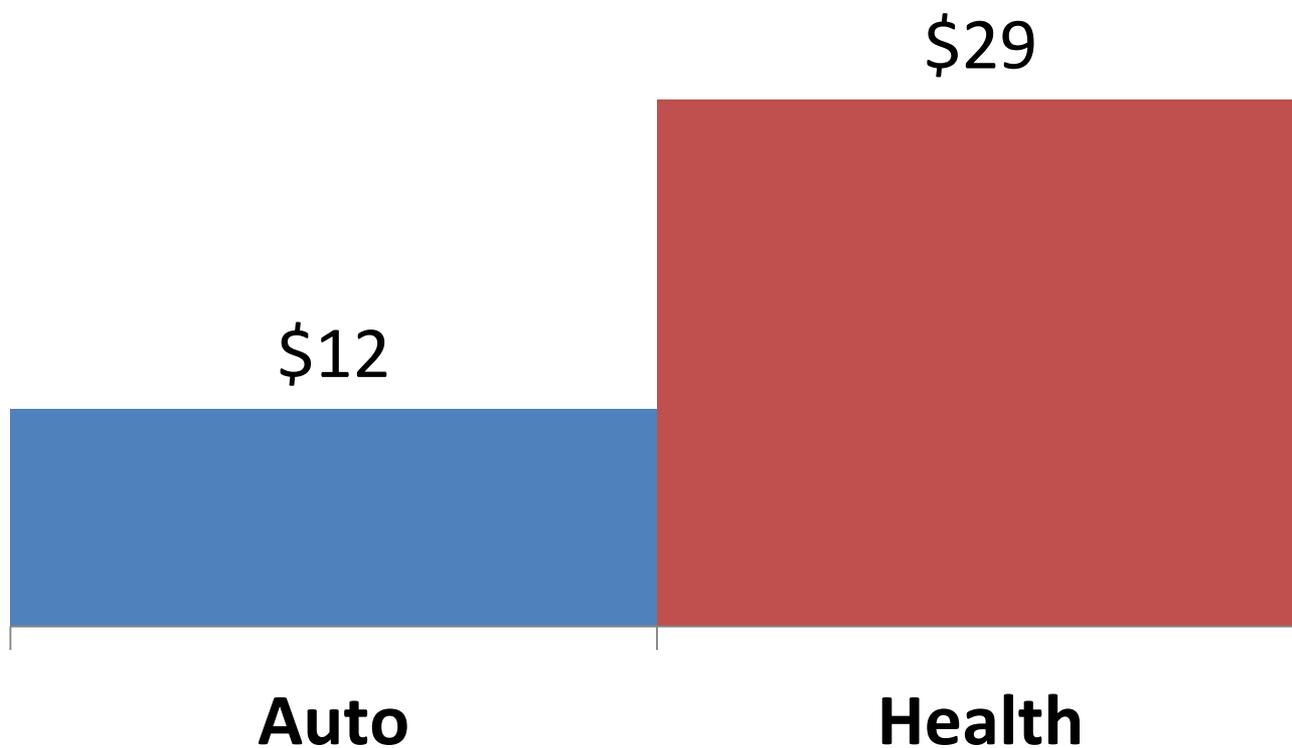

Burden Categories- ECONOMIC COSTS

- Medical & mental health
- Other resources/ Tangible
 - Emergency services
 - Victim services
 - Legal/court/jail
 - Insurer Admin Costs
 - Property damage
- Work loss (productivity)
 - Wage work
 - Household work
- Quality of Life

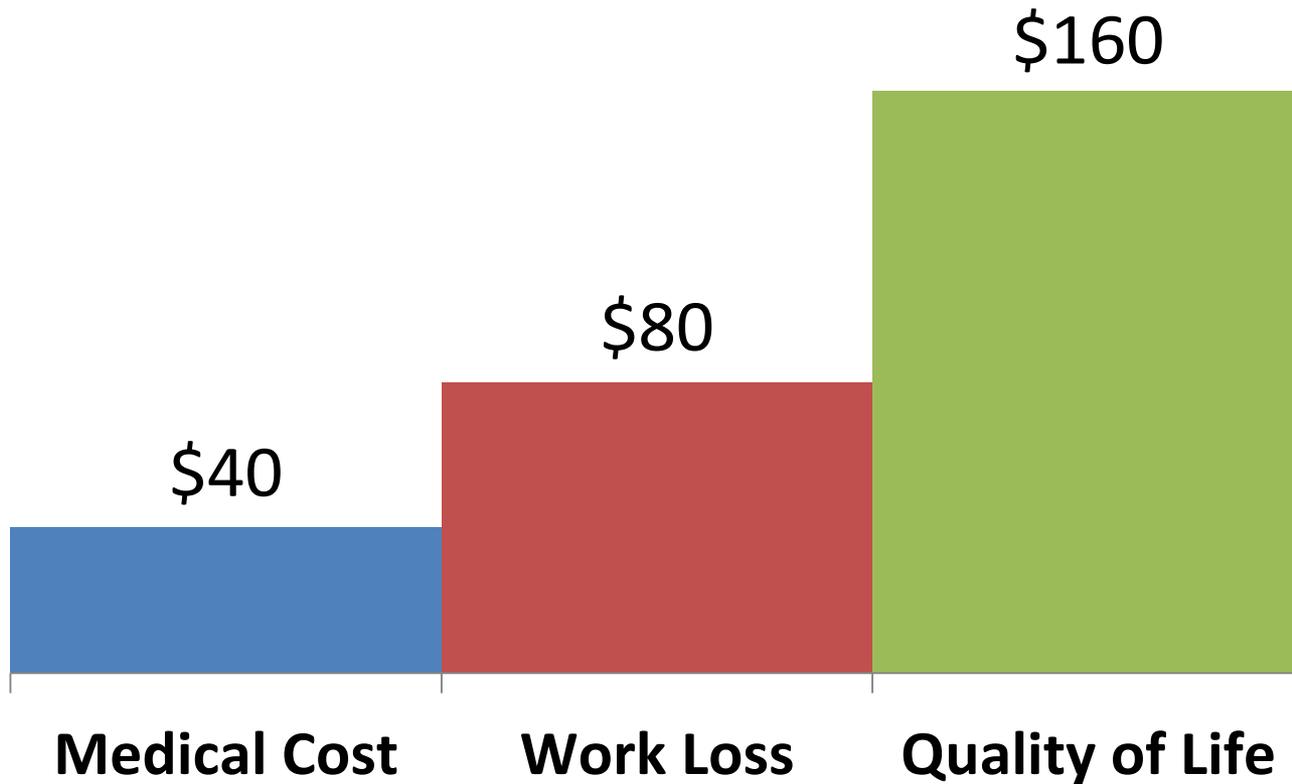

A \$12 bike helmet for kids 0-4 saves \$580 (BCR 48)

A \$12 Bike Helmet for Kids 3-14 Saves Insurers \$41

A \$19 bike helmet for ages 15 & above saves \$280 (BCR 16)

Injury Data Sources and Limitations

Some Data Sources are applicable for national level or state analysis

- CDC WISQARS- Mortality Data (state/regional)
- NEISS-AIP (national/regional)
- HCUP NIS (national/regional)
- NASS/GES (national)

Some data samples are designed to be representative of the national or regional picture and not counties or local jurisdictions

Other Injury Data Sources Available for County and Community Level Analysis

Data Examples

- CDC WONDER
(<http://wonder.cdc.gov>)
- HCUP SID
(<http://hcupnet.ahrq.gov/>)
- HCUP SEDD
(<http://hcupnet.ahrq.gov/>)

Secondary data sources have limits including timeliness of data and limited identifiers

Local Partnerships

- Collaboration with Local and State Partners
- Schools
- Local Hospitals, Trauma Centers
- Health Plans
- Community Programs

Other Data Sources Available for City and Community Level Analysis- FARS

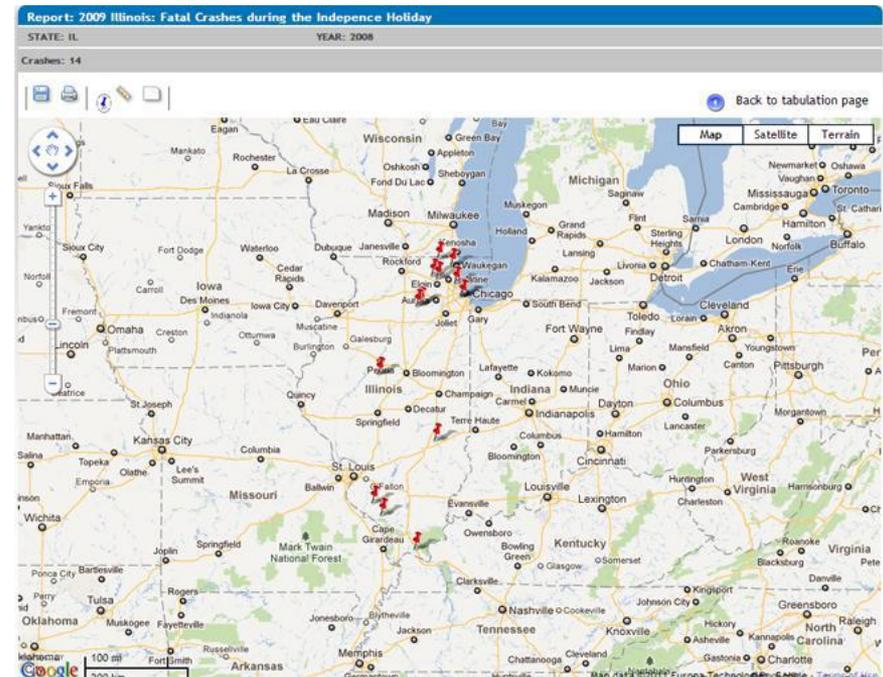

- Fatality Analysis Reporting System (FARS) – NHTSA
 - Census of crash involved fatalities on US roads
 - 120+ Accident, Vehicle and Person Attributes Coded
- GPS Coordinates Available
- Online GIS Viewer

Report: 2009 Illinois: Fatal Crashes during the Independence Holiday

Map It!

Data Sources Available for City and Community Level Analysis- YRBS

- Youth Risk Behavior Survey (YRBS) provides data on health-risk behaviors among 9th–12th grade students in the United States
- Collected every 2 years (2011 most recent)
- Comparisons between 43 states, 21 Districts and national level data are possible

| States* | | | | |
|---------------|-------------|--------------|----------------|---------------|
| Alabama | Alaska | Arizona | Arkansas | Colorado |
| Connecticut | Delaware | Florida | Georgia | Hawaii |
| Idaho | Illinois | Indiana | Iowa | Kansas |
| Kentucky | Louisiana | Maine | Maryland | Massachusetts |
| Michigan | Mississippi | Montana | Nebraska | New Hampshire |
| New Jersey | New Mexico | New York | North Carolina | North Dakota |
| Ohio | Oklahoma | Rhode Island | South Carolina | South Dakota |
| Tennessee | Texas | Utah | Vermont | Virginia |
| West Virginia | Wisconsin | Wyoming | | |

| Districts* | |
|---------------------------|-----------------------|
| Boston, MA | Broward County, FL |
| Charlotte-Mecklenburg, NC | Chicago, IL |
| Dallas, TX | Detroit, MI |
| District of Columbia | Duval County, FL |
| Houston, TX | Los Angeles, CA |
| Memphis, TN | Miami-Dade County, FL |
| Milwaukee, WI | New York City, NY |
| Orange County, FL | Palm Beach County, FL |
| Philadelphia, PA | San Bernardino, CA |
| San Diego, CA | San Francisco, CA |
| Seattle, WA | |

YRBS Health Risk Behaviors

- Alcohol Use
- Behaviors that Contribute to Unintentional Injury
- Behaviors that Contribute to Violence
- Behaviors that Contribute to Violence on School Property
- Marijuana, Cocaine, and Other Illegal Drug Use
- Obesity, Dietary Behaviors and Weight Control Practices
- Physical Activity
- Sexual Behaviors and HIV Testing
- Suicide-Related Behaviors
- Tobacco, Alcohol, and Illegal Drug Use on School Property
- Tobacco Use

BUILD A LOCAL LEVEL INJURY SURVEILLANCE SYSTEM USING EXISTING RESOURCES

Leslie Ray, MPH, MPPA, MA
Senior Epidemiologist
County of San Diego
Health and Human Services Agency

YES, IT CAN BE DONE...

- Community demand for accessible, reliable and routinely collected data for grants, prevention efforts, prioritization and evaluations
- San Diego County EMS began developing an Injury Surveillance System fifteen years ago that evolved into the Community Profiles
 - Expanded to include chronic disease, infectious disease, maternal and child health, behavioral health (mental health, substance abuse)
 - Also includes demographic data and survey data on risk behaviors
 - Everything is mapped by community
 - SAME basic data sources for all disease/injury data

WHAT YOU NEED TO KNOW...

- There are challenges in accessing and using local data
 - Small numbers analysis
 - Statistical significance
 - Confidentiality
 - Understanding coding systems
- There are benefits to using local data for local action
 - Primary vs. secondary data collection
 - Local data does not necessarily mean primary collection
 - People identify with local data
 - Surveillance system design strategies
- You need internet access and some creativity!

WHAT IS THE PURPOSE OF YOUR SYSTEM?

- Identify priorities?
- Change policies?
- Answer questions?

- Measure effectiveness of a prevention?
- Track trends?
- Save kids lives?

A WELL DESIGNED LOCAL SURVEILLANCE SYSTEM CAN BE THE SOURCE OF MULTIPLE INFORMATIONAL MATERIALS AND FACT SHEETS

UNINTENTIONAL INJURY IN SAN DIEGO COUNTY

JUNE 2012

COUNTY OF SAN DIEGO
HHSA
HEALTH AND HUMAN SERVICES AGENCY

- Analyze data once, repackage for individual audiences and different needs.
- Consistency in reporting numbers and rates.
- Trends!
- Health disparities are identified.

PRACTICALLY PRIMARY DATA SOURCES

Data you collect yourself, or collect locally such as trauma registry, EMS paramedic reports, child death reviews, special project or grant data, or one time surveys, that other jurisdictions do not collect in the same way.

■ Pros

- More timely or faster turnaround
- Potentially more detail in text fields
- May influence questions or fields collected
- Opportunity to highlight prevention partners contributions
- Access is often based on relationships

■ Cons

- Often preliminary, subject to change
- Questions may change or data collection may not be repeated in future
- Data collection may be dependent on funding
- No state or national comparison data
- Access is often based on relationships

SECONDARY DATA SOURCES

Data that is collected for another purpose, usually required by law or regulation and includes vital records deaths, hospital discharge data, and emergency department discharge data.

■ Pros

- More stable systems
- Can compare with other counties, states and national rates
- Often available at zip code or small area level
- Payor source and billed amount data
- Usually no cost to local governments

■ Cons

- Need to understand coding systems
- Time lag up to 2 years
- Not much detail

CODING SYSTEMS

- Vital records, hospitals, emergency departments and CMS doctor's offices code diagnosis, external cause and procedures using either ICD9 or ICD10 or CPT codes
- By 10/1/2014 CMS will require everyone will use ICD10
 - E-codes replaced by V-Y codes
- Caution! Big differences between diagnosis (unduplicated count) and billing (duplicated count) records
- Make friends with someone who understands these systems or take a class

OTHER DATA TO COMPLETE YOUR SYSTEM

- Census data needed for denominators
 - American Community Survey (aka the Census)
 - American Fact Finder 2
 - Local Planning Agency or Designated Census Holder
- Risky behaviors
 - Youth Risk Behavior Survey (22 states)
 - High school level kids and questions on their risk behaviors
 - American Community Survey www.census.gov/acs
 - Some data on housing, insurance and household configurations
 - State or Local Surveys
 - In California use the CA Healthy Kids Survey
 - United Way surveys

AMERICAN COMMUNITY SURVEY (ACS)

- Collects information such as age, race, income, commute time to work, home value, veteran status, and other important data
- Data available at the national, state, county, census tract, congressional district, and more

The screenshot displays the American Community Survey website interface. At the top, there is a navigation bar with links for People, Business, Geography, Data, Research, and Newsroom. Below this is the main header for the American Community Survey, followed by a secondary navigation bar with links for Main, About the Survey, Guidance for Data Users, Data & Documentation, Methodology, and Library. The main content area is divided into several sections: a 'Question Corner for Survey Respondents' with a privacy question, a 'Language Brochures' section listing 11 languages, and a featured 'My Congressional District' tool. The tool includes a map of the United States and a list of features such as statistics for every district, data collected by the ACS, and options to share or download statistics. On the right side, there is a search bar, a 'Current Data Profiles' section, and a 'Data by Topic' list.

www.census.gov/acs

CALCULATE THE COST OF INJURY

- Injuries have defined prevention opportunities that fit neatly into ROI and cost models.
- CDC staff and members of the Injury Control and Emergency Health Section of APHA have worked on various cost of injury calculators for years.
- On the CDC website WISQARS can provide both incidence data for your state or county as well as a cost estimation calculator that includes both direct medical costs and work loss costs.
- Policy makers and the public pay attention to dollars.

THE ECONOMIC BURDEN OF INJURY IN SAN DIEGO COUNTY

COUNTY OF SAN DIEGO
HHSA
HEALTH AND HUMAN SERVICES AGENCY

LIVE WELL
SAN DIEGO

WISQARS™ provides cost estimates for injury deaths (including violent deaths) and nonfatal injuries where the patient was treated and released from a hospital or ED. <http://www.cdc.gov/injury/wisqars/index.html>

| <u>UNINTENTIONAL INJURY</u> | Number of cases | Medical costs | Work loss costs | Total combined costs |
|------------------------------------|-----------------|---------------|---|------------------------|
| Deaths | 949 | \$11,868,000 | \$1,002,829,000 | \$1,014,696,000 |
| Hospitalizations | 21,149 | \$540,635,000 | \$1,113,603,000 | \$1,654,238,000 |
| ED discharges | 149,437 | \$136,439,000 | \$473,753,000 | \$610,192,000 |
| | 171535 | \$688,942,000 | TOTAL UNINTENTIONAL INJURY COSTS | \$3,279,126,000 |

| <u>INTENTIONAL INJURY</u> | Number of cases | Medical costs | Work loss costs | Total combined costs |
|----------------------------------|-----------------|---------------|-----------------------------------|----------------------|
| Homicides | 90 | \$645,000 | \$144,997,000 | \$145,642,000 |
| Assault Hospitalizations | 1,644 | \$38,947,000 | \$152,845,000 | \$191,792,000 |
| Assault ED discharges | 8,188 | \$9,041,000 | \$27,661,000 | \$36,702,000 |
| | 9922 | \$48,633,000 | TOTAL ASSAULT INJURY COSTS | \$374,136,000 |

| | | | | |
|------------------------------------|-------|--------------|--|----------------------|
| Suicides | 365 | \$1,390,000 | \$400,950,000 | \$402,339,000 |
| Self-inflicted Hospitalizations | 1,590 | \$15,120,000 | \$29,807,000 | \$44,928,000 |
| Self-inflicted ED discharges | 2,435 | \$3,360,000 | \$2,329,000 | \$5,689,000 |
| | 4390 | \$19,870,000 | TOTAL SELF-INFLICTED INJURY COSTS | \$452,956,000 |

WISQARS™ also calculates cost estimates by injury mechanism.

UNINTENTIONAL INJURY

*for 2009

Number of cases

| | Overdose/ Poisoning | Falls | Pedestrian | |
|------------------|--------------------------------|--------------|-------------------|-----|
| Deaths | | 409 | 231 | 59 |
| Hospitalizations | | 2,365 | 10,734 | 348 |
| ED discharges | | 4,677 | 52,581 | 963 |

Total costs (both medical & work loss) det. by WISQARS

| | | | |
|--|----------------------|----------------------|----------------------|
| Deaths (based off 2005 CA costs) | \$492,291,000 | \$85,786,000 | \$65,859,000 |
| Hospitalizations (based off 2005 US costs) | \$34,325,000 | \$666,846,000 | \$50,822,000 |
| ED discharges (based off 2005 US costs) | \$6,539,000 | \$237,293,000 | \$3,972,000 |
| Total costs of all three categories | \$533,155,000 | \$989,925,000 | \$120,653,000 |

Calculated cost per person

| | | | |
|------------------|-------------|-----------|-------------|
| Deaths | \$1,203,645 | \$371,367 | \$1,116,254 |
| Hospitalizations | \$14,513 | \$62,124 | \$146,040 |
| ED discharges | \$1,398 | \$4,512 | \$4,124 |

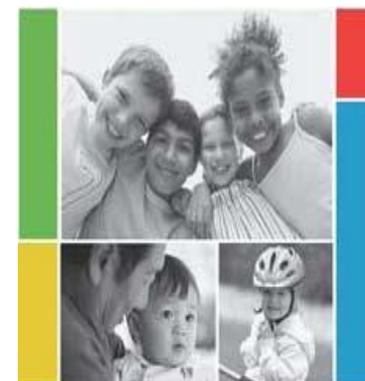

NATIONAL ACTION PLAN FOR CHILD INJURY PREVENTION

The *National Action Plan* calls for better standardizing of data, improving data quality, and filling gaps that will help inform prevention efforts.

Goals for Data and Surveillance:

- Improve existing data collection systems
- Upgrade and enhance systems to address gaps in data
- Improve access to data
- Improve analysis, interpretation, and dissemination of surveillance data
