### Funding:
- Currently funded by HRSA

### Key Data Sources:

NA
Burden:

The Annualize Crude Rate of those ages 0-24 is: 6.00

Relevant State Laws:
- Has a Sports Related Concussion law
- Requires a helmet for bike riders 1-13 years old. Riding with children under 1 is prohibited
- Requires all motorcycle riders to use a helmet
- Has a TBI Waiver program

Programs and Activities:
Main work on TBI is to implement a five-year action plan that we were able to develop through a needs and resources assessment and lots of discussion with stakeholders and that was made possible through HRSA grant funding. The TBI action plan is on the website. There are five policy areas one: improve public information and outreach (focus on pediatric TBI); second is to improve access to community-
based services; Increase provider training opportunities; Maximize education and vocational opportunities; as well as to enhance access to affordable accessible housing. These transcend ages and certainly affect children.

**Goals**

Gain insight into what other states are doing in the area of TBI which we could replicate

Use best practices to improve what we do here in New York.
